Sercos II Specification (Version 16v2.2)

QTY

Digital interface for communication between controls and drives for numerically controlled machines.
(Note: This is the documentation on which the Sercos I/II standard is based. This is not the official IEC standard document, which can be ordered from the IHS Standards Store.)

Cost: Free to members/\$225 non-members (add \$7 for postage)

SERCON816 Reference Manual

QTY

160-page manual describing the SERCON816 Sercos II ASIC controller. This ASIC runs at 2/4/8/16 Mbit/s to handle communications between the motion control microprocessor and the fiber optic transmitter/receiver (shipped on diskette or emailed).

Cost: Free to members/\$65 non-members (add \$4 for postage)

Sercos II - I/O Functions

QTY

128-page manual describing the Sercos II-accepted I/O functions.

Cost: Free to members/\$65 non-members (add \$4 for postage)

Sercos II Application Notes

QTY

Set of application notes -- cover solutions to possible problems, provide suggestions for handling various situations and describe new features/functions (shipped on diskette or emailed).

Cost: Free to members/\$20 non-members (add \$4 for postage)

Sercos Brochures

Sercos III Brochure

A 24 page brochure describes Sercos III and discusses its advantages, describes CIP Safety on Sercos and discusses products for hardware implementation.

Sercos interface for packaging machines

Cost: Single brochures are free.

Sercos Whitepapers

Sercos Energy

An 8 page whitepaper describes Sercos Energy, the energy conservation profile for the Sercos III Real-time Ethernet Communications System that can reduce energy consumption on machines and systems.

Cost: Single brochures are free.

News Magazines

These magazines cover the latest Sercos developments, include applications articles and provide information on member's Sercos products.
